MEET FLOTO • AI ARCHITECT

"Hey! I'm Floto. Let's automate your workflows & build your dream web system!"

Powering CRM pipelines, background execution loops, and edge web platforms.

⚡ Next-Gen Software Engineering & AI Operations - Built for Scale, Speed, and Sub-Second Execution.

| 2026 - 2030

COMPANY PROFILE

DotnLott engineers high-performance digital backbones for modern companies. We bridge the gap between complex manual tasks and sub-second operational execution, building secure, 24/7 autopilot pipelines.

Architecting the Future of Digital Growth

DotnLott was established to solve a critical market disconnect: mid-sized companies either settle for rigid off-the-shelf software or face massive financial risks with expensive digital agency retainers. We deliver modular, risk-free software engineering and AI automation suites tailored to your exact operational requirements.

OUR SCALABLE PHILOSOPHY

Why Are We Called "DotnLott"?

We believe digital growth shouldn't require massive upfront risk. You start with a small, high-impact micro-automation (a "Dot" starting @ ₹499) to solve an immediate operational headache. Once proven, we seamlessly scale your systems into an end-to-end custom enterprise ecosystem (a "Lott").

Founder's Note

DotnLott was founded on a simple belief: powerful technology shouldn't be expensive, complicated, or risky to adopt. We help businesses begin with small, practical automations that deliver immediate value and grow alongside their business.

"We make AI and Business Automation accessible through modular, low-risk solutions—allowing businesses to automate confidently and scale progressively."

Sonalika Samal & Abhishek Abhinav

Co-Founders, DotnLott

The DotnLott Engineering Advantage

Direct Devs

Collaborate directly with senior full-stack architects. No middlemen PMs.

Code Owners

Full Git repository transfer with absolute zero vendor platform lock-in.

Safe & Private

Isolated VPS containers, 256-bit SSL, and zero third-party data logging.

Flat Pricing

Clear pricing structure with fixed setups and zero hidden retainers.

Legal NDAs

NDAs executed prior to scoping under registered Private Limited entity.

24-72h Speed

Landing pages and workflow automations live in 1 to 3 business days.

Our Vision

To democratize business automation and sub-second web technology, making enterprise-grade execution accessible, simple, and completely risk-free for ambitious businesses globally.

Our Mission

To engineer robust, self-healing background automation pipelines and lightning-fast custom web applications that eliminate manual labor, lower overheads, and scale customer revenue.

💡 100% Transparency & Direct Developer Access - Zero Middlemen, Zero Hidden Retainers.

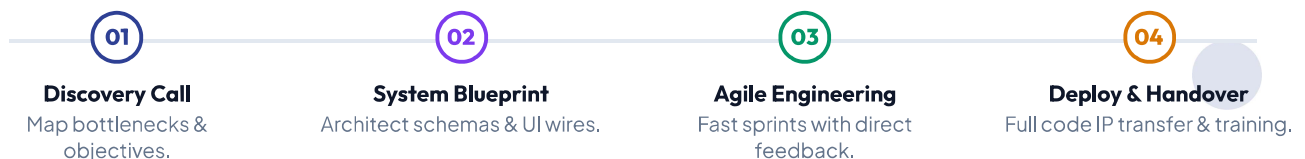

12 Production-Ready AI Automation Suites

Our modular background automation architectures operate 24/7 to connect your CRMs, communication channels, cloud spreadsheets, and internal databases with zero manual intervention.

Explore our 12 specialized operational suites below, designed for instant integration and scalable enterprise performance:

 AI Workflow Automation Multi-app API routing, webhooks, and logic branches running 24/7 without manual effort.	 CRM Automation Bi-directional database sync, contact lifecycle updates, and lead age warning alerts.	 WhatsApp Automation Official API triggers, automated broadcast campaigns, interactive menu flows, and alerts.
 AI Voice Agents Inbound call handlers and voice agents with natural synthesis, qualification, and CRM logs.	 AI Chatbots & Copilots Custom RAG support widgets and staff copilots trained directly on company databases.	 Email Outreach Autopilot Prospect scraping, email verification, drip sequences, and inbox warmup protocols.
 Lead Management Suite Meta/Web form intake, automated lead scoring, intent classification, and sales rep routing.	 Invoice & Quote Engine Dynamic PDF quotes, automated payment receipts, and recurring billing sync.	 HR & Internal Ops Shift reminders, leave tracking, SLA delay ticket alerts, and check-in workflows.
 Social Media Autopilot AI graphic poster generation, multi-channel post scheduling, and daily publishing.	 Travel Business Suite Rate lookup triggers, automated traveler itineraries, and instant confirmations.	 Custom AI Solutions Bespoke Python scripts, autonomous LLM agent pipelines, and REST API integrations.

Development Process Timeline

 Autopilot Operations - Running 24/7/365 to Eliminate Manual Bottlenecks.

Automation Suite Pricing & Plans

We operate on flat, transparent one-time setup fees. You maintain complete ownership of your data and server environments without mandatory ongoing platform fees.

STARTER

Starting from

₹499

One-Time Setup Fee

Test out automation with 1 micro-workflow suite.

- ✓ 1 selected suite
- ✓ Managed cloud
- ✓ Standard support

GROWTH

Starting from

₹999

One-Time Setup Fee

Scale operations across 3 operational pipelines.

- ✓ 3 selected suites
- ✓ Cloud / Client VPS
- ✓ Priority support

BUSINESS

Starting from

₹1,999

One-Time Setup Fee

Unlock automated workflows across all 12 suites.

- ✓ All 12 suites access
- ✓ Dedicated VPS
- ✓ Executive setup

ENTERPRISE

Custom Pricing

Custom

Bespoke Scope

Custom multi-agent LLMs & dedicated SLA.

- ✓ Bespoke scope
- ✓ Private cloud array
- ✓ 24/7 dedicated SLA

Deployment & Infrastructure Matrix

FEATURE CRITERIA	STARTER (FROM ₹499)	GROWTH (FROM ₹999)	BUSINESS (FROM ₹1999)	ENTERPRISE
Suite Access	1 Selected Suite	3 Selected Suites	All 12 Suites Access	Custom Engineering
Deployment Model	Managed Cloud	Cloud or Client VPS	Dedicated Client VPS	Private Cloud Array
Hosting Control	Shared Infra	Isolated Tenant	100% Root Control	Custom Cluster
Data Ownership	100% Encrypted	100% Client Owned	100% Client Owned	Full On-Premise
Support Level	Standard Email	Priority Email/Chat	Dedicated Call	24/7 Dedicated SLA
Best For	Micro-Task Wins	Growing Teams	Full Operations	Large Scale Enterprise

 Pure Setup Investments - No Mandatory Subscriptions or Recurring Software Fees.

Custom Web Development & Packages

We engineer custom, edge-rendered web applications that deliver sub-second performance. By replacing bloated database frameworks with static edge distribution, our web architectures maximize user conversion rates and organic search rankings.
